

NETHERLAND, SEWELL & ASSOCIATES, INC.

More companies pick NSAI for their SEC reserves reporting than any other consulting firm.

(based on most recent John S. Herold, Inc. survey)

NSAI 

One of the **most respected** names
in independent reserves reporting

NSAI 

Preferred by companies
who need **reliable results**

NSAI 

Quality at
a **competitive price**

NSAI 

Expertise when
you need it

Because There Is A Difference

Netherland, Sewell & Associates, Inc. (NSAI) was founded in 1961 to provide the highest quality engineering and geologic consulting to the petroleum industry. Clarence Netherland and Fred Sewell set standards consistent with their long-term management philosophy. Those standards have endured and have served our clients well.

An NSAI report honors all the data and industry reserves definitions to give a full and fair inventory of reserves and cash flow. Each report is based on sound judgment, broad experience, technical expertise, and accepted practices.

**Our clients expect quality and integrity.
We demand it.**

NSAI Certified

Since our founding almost 50 years ago, we have delivered thousands of reports to petroleum and financial concerns throughout the world. Users of our reports have learned that each aspect of an NSAI evaluation is solidly supported. NSAI reports have earned a reputation for reliability because of the substance behind each one.

Whether it is for a small property in East Texas or a giant LNG development in the Middle East, our clients know that an NSAI report will be highly respected.

We are committed to delivering reliable results.

A World Of Experience

Our clients include small privately owned oil and gas companies, major and independent oil and gas companies, government owned oil and gas companies, financial institutions, government agencies, investors, and law firms.

We offer a complete range of engineering, geological, and geophysical services and have the technical experience and ability to perform these services in any of the onshore and offshore oil and gas producing areas of the world. Our services include:

- Acquisition and Divestiture Evaluations
- Barnett Shale and Other Shale Gas Plays
- Canadian, London, and Other Non-U.S. Regulatory Agency Reports
- Coalbed Methane Development Studies
- Deepwater Development Studies
- Enhanced Recovery Projects
- Equity Determinations
- Exploration Resources Assessments
- Gas Storage Development Studies
- Modeling and Simulation
- Operations Engineering Services
- Project Finance Certifications
- SEC Reserves Reports and Audits

Our People

Our engineers and geoscientists are all proven performers selected from major petroleum companies and independents. They understand the critical relationship that exists between our clients and the financial community. Our petroleum analysts, mapping specialists, and computer experts share the same spirit of excellence and commitment to service. Our people built the NSAI reputation one reserves report at a time.

All the principal disciplines of exploration and production are represented by our technical staff:

- Reservoir Engineering
- Geology and Geophysics
- Petrophysics
- Economics
- Operations

Our Approach

We apply the right combination of people, expertise, and technology to each assignment. A mature field may require classical performance and volumetric analyses to assess its developed and undeveloped potential, while an integrated study with reservoir simulation may be required to fully evaluate a new discovery. Whatever the scope, the result is a substantial and reliable technical evaluation.

Our process also integrates the technical evaluation with the commercial aspects of the assets. We can independently evaluate pricing, expenses, capital, and the reasonableness of future development plans. Priority is placed on keeping our clients involved during the evaluation process so we can benefit from their valuable knowledge of the properties.

We deliver a full and fair inventory of reserves and cash flow.

Your Choice

While our reputation gives us the opportunity to attract new clients, we know we must consistently deliver quality reports and provide superb service to retain existing clients. We will do our best to get you what you need when you need it. From the routine to the unexpected, our clients know they can rely on NSAI.

We expect to exceed your expectations.

Contact NSAI for an in-depth presentation at a convenient time and place. We will gladly show you how our services can be tailored to your specific needs.

Our clients get the NSAI name and our team of experts. We think they get the very best.
